

GINSENG & SAW PALMETTO COMBINATION

100 CAPSULES STOCK No: 1110

Ginseng and Saw Palmetto is a herbal combination for men, designed to help reduce inflammation in the reproductive and urinary systems, particularly the prostate and kidneys.

Siberian Ginseng root helps the body respond more quickly to stress, increasing the production of DNA, RNA and Proteins, while stimulating the adrenal, pancreas and pituitary glands to lower blood sugar. It also improves the flow of digestive fluids and is a mild sedative which calms the nerves.

Saw Palmetto has the effect of increasing the flow of urine, shrinking inflamed tissue and improving blood circulation.

The combined effect of the other herbs in the formula which include parthenium, gotu kola, damiana, sarsaparilla, horsetail, garlic, capsicum and chickweed provide a valuable support to the male reproductive system, particularly for men of forty and over.

There are 100 capsules per bottle. NSP recommends taking one capsule three times daily, preferably with meals, as an addition to the everyday diet.

Also see MEN'S FORMULA, being a further product designed especially for men, providing nutrients for the prostate gland.

NOTE: **Ginseng & Saw Palmetto Combination** is not available from the UK Stock List, but can be obtained from 'Sunshine Direct' at the NSP facility in Spanish Fork, USA. For details call Arthur at 01691 780094
